## WORK EXPERIENCE

---

### Value Engineer Team Lead DB Schenker

📅 February 2019 - current

- Implemented and maintained multiple integration systems leading to an improvement in the time to process inbound production, and have helped **save over \$10K per year** by reducing labor time per product while improving performance.
- Implemented and maintained Power Apps based Continuous Integration/Continuous Delivery system leading to an **improvement in the time** to release new process updates **by 20%**.
- Built, maintained, and scaled a **web application with over 10000 lines of code** for monitoring, QA, and labor management of the production line.
  1. Set up a environment for development and deploying using the **WAPP stack**.
  2. Collected requirements based on the process to create the **data structures** that successfully meet the objective.
  3. Designed and implemented an effective, reusable, intuitive and functional **visual interface** to meet a required data capture with a minimized user interaction.
  4. Writing **optimized code** to achieve the best performance for the **front-end** and the **back-end** data processing.
  5. Working with the management and the operators in the line to capture inconsistencies and **develop new features** and automation.
- Performed other tasks as assigned.
